

ALU BUFF Aluminum & chrome Polish

Description :

Alu Buff is a product developed with the latest technologies in polishing metals like aluminum, chrome, stainless steel, copper, bronze, silver and tin. Using micro abrasives for polishing without leaving abrasions marks, it also removes stains without leaving a greasy surface.

Its liquid formula gives an ease of application and a quick polish giving a luster of extreme shine. The addition of a polymer sealant acts as a film-forming agent on all polished surfaces.

Can be applied to all oxidized metal surfaces. Restores tarnished aluminum to a chrome finish. Ideal for wheel rims, foot steps and truck fuel tanks. Eliminates bluish reflections and traces of boot tracks on motorcycles silencers. Excellent for polishing home collectibles, silver and stainless steel sinks.

Advantages :

- Quick action due to its liquid formula.
- Does not leave scratches on softer metals.
- Economical because the product does not dry.
- Do not leave a white film on polished surfaces.
- Provides unmatched brilliance.
- Cleans and protects in one application.

Instructions :

Shake well before use. Soak a folded terry cloth into the palm of the hand. Apply Alu Buff on the surface to be polished with circular movements or forward / backward, pressing firmly. Let dry until the product becomes opaque (about 1-2 minutes). Clean off the residue with a clean and soft cloth.
