Flash point : Non flammable. Auto-ignition temperature : Not applicable.

Flammability limits – air (%): LEL: UEL:

Extinguishing media: Carbon dioxide, water spray. Dry chemical foam water can be used to cool

exposed containers.

Protective equipment: Self-contained breathing apparatus and protective clothing should be worn in

fighting fires involving chemicals.

Hazardous combustion materials : Silicon oxides, carbon oxides, nitrous oxydes, formaldehydes.

Recommendations : Remove containers from area if safe to do so. Do not disperse with high

pressure water jets. Dam water run-off. Cool containers with water.

Notes: Organic components can ignite once water has evaporated.

6. ACCIDENTAL RELEASE MEASURES

Wear appropriate protection equipment. Restrict access to spill area to qualified personnel. Insure to have adequate ventilation. Do not touch spilled product. Prevent product from entering sewers or waterways. Stop leak if safe to do so.

Small spill: Dam area if necessary. Pump (if possible) and store in appropriate container.

Contain and absorb product with suitable absorbing material. Store residues in

closed containers identified for elimination.

Large spill: Dam area if necessary. Pump (if possible) and store in appropriate container.

Contain and absorb product with suitable absorbing material. Store residues in

closed containers identified for elimination.

7. HANDLING AND STORAGE

Handling: So not breathe vapours or aerosols. Avoid contact with eyes or skin by wearing

appropriate equipment. Avoid contact with incompatible materials. Wash after handling the product. Wash contaminated clothing before reuse. Empty containers

may contain residue. Dispose according to existing regulations.

Storage: Store in a cool and dry area, well ventilated and away from incompatible materials.

Prevent from freezing.

8. EXPOSURE CONTROL / PERSONAL PROTECTION
