

# SCRATCH OFF

## Scratch Remover & Headlight Polish

### Description :

This cream is a unique formula based with micro crystallines. The scratch remover is designed to erase and polish scratches & marks on all types of paint. Removes friction marks and traces of rust. Also used for chrome, aluminium & head light plastic surfaces.

### Advantages :

- Can be applied to the vehicle exposed to the sunlight.
- Can be applied by hand or with a polisher.
- Removes fine scratches on paint and plastic.
- Restore headlights quickly and efficiently.

### Instructions :

#### Scratch remover

Apply a small amount on a dry cotton cloth, rub briskly in same direction of the scratch. If the scratch is deep, retouching the paint may be necessary with the product recommended by the car's manufacturer. Once the paint has dried, the scratch remover can be used for finishing touch.

#### Headlight Polish

Follow the steps in the # P2011 Headlight Polishing Kit to do the right water sandblasting. Apply SCRATCH OFF to a 3 "polishing pad and then polish your headlights by hand or with a polisher.
