

GO SHINE Instant Shine H₂O

Description :

Formulated with the body shop industry solution/needs in mind, GO SHINE is the perfect water-based non-silicone tire dressing that adds instant gloss to vinyl, rubber and plastic. This product is very economic to use and VOC compliant. Ready-to-use; preserves and restores gloss on rubber and plastic. This formulation contains surfactants that lift and release road grime leaving behind a sparkling shine on tire.

Recommended Use:

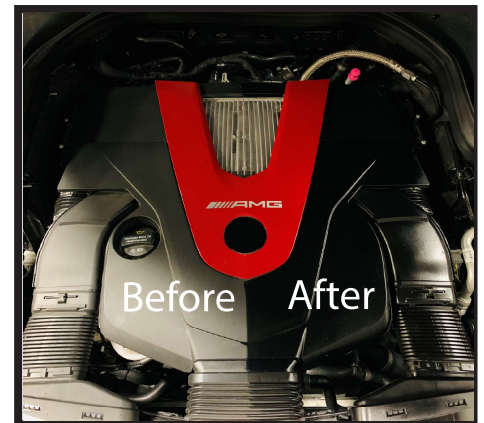

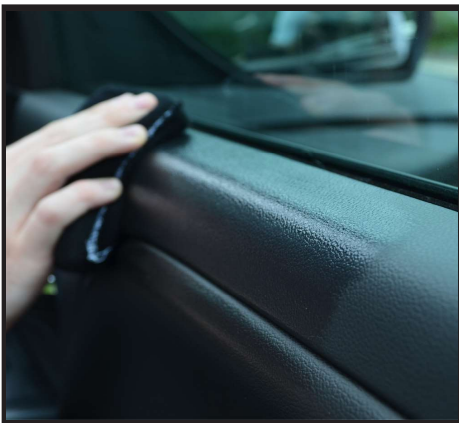

Tires and fenders, porous, unpainted exterior plastics. To renovate and shine the engine compartment. To shine the black insulation pads of the hood.

Advantages :

- Time saving: can be applied on wet tires, no need to dry.
- Works with any common techniques; spray, wipe or brush.
- Water-based formula enhances body shop security.
- Very user- friendly with pleasant scent.

Instructions :

Apply GO SHINE to surface with a brush or spray evenly on surface, for maximum gloss and allow it to dry. Wipe the excess of product from the rim. If surface is extremely dirty, cleanse before with an AUTO-CHEM Cleaner and rinse thoroughly. GO SHINE can be applied on a wet surface.
