

# **JAM RIM CLEANER**

## Neutral pH Rim & Fall Out Cleaner

### Description :

Excellent neutral pH cleaner to quickly clean all types of wheels without danger. Removes grease, dirt and dust from brakes, wheel covers and rims. Safe on aluminum or magnesium wheels. Does not damage brake pads and varnish on alloy wheels. This product can be used as a iron fall out remover on paint.

JAM RIM CLEANER contains a special blend of penetrating agents that dissolve dirt and a neutralizing substance that becomes active when you rinse it off. Formulation reinforced with thixotropic agents that grip the vertical surface for better cleaning.

### Advantages :

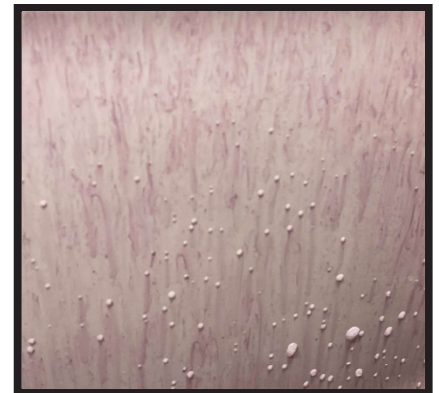

- "Active Sense" formula that change the product color on contact with a ferrous material.
- Prevents rust on the brake discs.
- Cleans easily and quickly: spray and rinse.
- Safe for vehicle paint.
- Low odor, conforms to VOC standards.

### Instructions :

First rinse the surface with water and spray JAM RIM CLEANER directly on the rims. Let the product work for about a minute. Rinse with a powerful jet of water. Wipe with a cloth or let it dry. When the rims are very dirty, apply the product and scrub with a brush. Rinse with a powerful jet of water. **DO NOT LET DRY ON THE SURFACE.**

Do not apply this product to cold or hot surfaces. Do not let the product dry on the surface. Do not apply this product to wheels with a colorless coating that is cracked or chipped as it may discolor the wheels. Do not apply to polished aluminum rims, aftermarket or anodized rims because a matte finish may result.

**NOTE :** Test it first on an inconspicuous area. If the rim finish changes in appearance or if any other negative reaction occurs, do not use this product.
