

ENGINE DEGREASER

Heavy Duty Degreaser

Description :

ENGINE DEGREASER is a high quality powerful degreaser that quickly and effectively removes dirt from automobile engines, parts, tools, machinery and farm equipment. Also use to remove oil and grease stains from garage floors or other concrete floors.

It can be effectively used on a hot or cold engine, produces a film-free compartment clean, ready to paint.

Advantages :

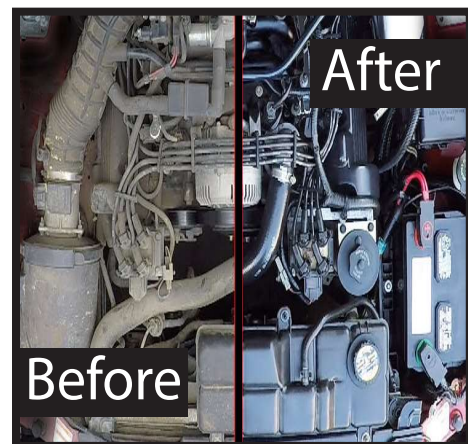

- Solvent-based formula that penetrates and dissolves grease.
- The formula includes emulsifying agents that lifts and removes the dirt once cleaned.
- This motor degreaser leaves a non-greasy and film-free surface.

Instructions :

NOTE: Remove the air filter and cover the carburetor throat with a cover, plastic wrap or metal foil.

Spray HEAVY DUTY DEGREASER over the entire engine with a spray tank (a rate of one quarter per vehicle). Let the product on the engine for 4 to 6 minutes. Once soaked, rinse the engine compartment with a high pressure jet of water. To speed up drying, blow off excess water and leave the engine running on neutral for about 5 minutes.

CAUTION: If spraying on automotive paint. Neutralize the solvents by rinsing the affected areas with water.
