RUST BLAST **Fast Penetrating Lubricant**

Description :

Rust Blast is a powerful combination of rust penetrating and capillary action lubricants. It quickly penetrates through rust, corrosion, water and dirt to loosen frozen nuts, bolts and other metal parts.

In seconds loosens and frees any part seized by rust, paint, varnish, carbon etc. Hundreds of uses. Looses bolts, nuts, screws, pipe threads without damaging the part and leaves a thin protective film that prevents rust and protects parts against further corrosion. Does not contain silicone. Safe for use on the finest metals.

Advantages :

- High quality antifriction formula.
- Strong capillary activity.
- Frees rusty nuts, bolts and fittings in seconds.
- Protects against rust and further corrosion.
- Lubricates to keep parts moving smoothly and quietly.
- Economical and ecological sprayable size.
- Silicone free.

Recommended use :

Automotive, industrial and construction equipment. Also manufacturing facilities, transportation industry, paper mills, printing-houses and finally at home or any other place that requires the best product on the market. It will reduce friction to decrease wear on locks, hinges, cables, chains, wheels and most moving parts.

Instructions :

Spray on surface to be treated (rusty bolts, nuts, screws, or pipe thread), allow 15 to 45 seconds for product to take action. If part is really stuck or rusty let product work for a few minutes to hours to have maximum results. Can be used for corrosion protection before assembling parts together.

Typical Physical Properties :

Color / Odor	Clear brown liquid / Oily scent
Flash point	49° C
Solid Content	(20 - 30) %
Evaporation Rate	5.2 Minutes
Density g/L	0.807g/L
Solvent	Petroleum Distillates
