

ALU CLEAN

Aluminum & Stainless Steel Cleaner

Description :

Fast chemical action that penetrates and removes road dust, and diesel smoke in 1 minute. Alu-Clean is a mixture of surfactants, emulsifying agents and acid. This product was developed to quickly and effectively remove grease, oil, dirt, stains and exhaust burns from heavily corroded aluminum and stainless steel. The use of Alu-Clean does not require any brushing, polishing or buffing.

Advantages :

- Highly Concentrated Formulation: Removes tough dirt, rust and grease faster with lower concentrations and temperatures than conventional acidic cleaners.
- Removes oxidation from metals and leaves a shiny finish.

Instructions :

Apply to a wet surface. Spray cleaner at recommended dilutions for proper cleaning. Always start by spraying the cleaner from the bottom, working a surface of 1.50 m (4 to 5 ft) wide by 3 m (8 ft) high. Let the cleaner activate for approximately one minute. Some surface conditions may require brushing for better results. Final rinse is from the top down.

Recommended Use:

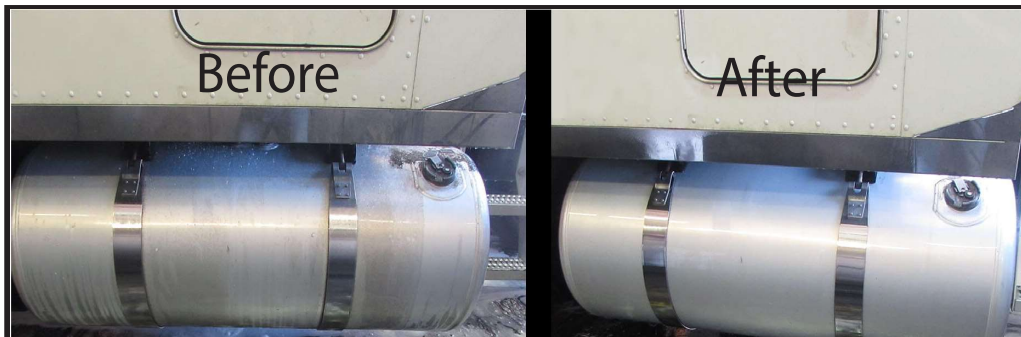

Dilution: The percentage of dilution may vary depending on the type of surface to be cleaned.

Light oxidation or relatively new surface: 40 - 1

Area with average oxidation: 20 - 1

Highly oxidized or corroded surface: 5 - 1

CAUTION: This product is not safe for glass and may bleach polished aluminum. Corrosive product, always wear protective clothing, gloves, rubber boots and safety glasses. Always use plastic containers. Never use galvanized containers to mix Alu-Clean.
