

GLASS 2 X

Glass Ceramic Coating

Description :

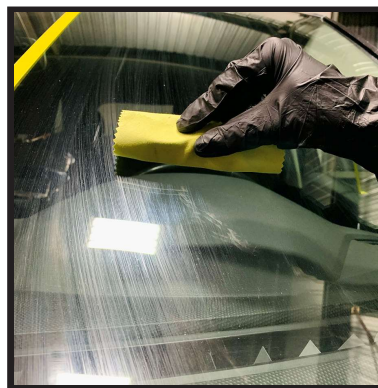

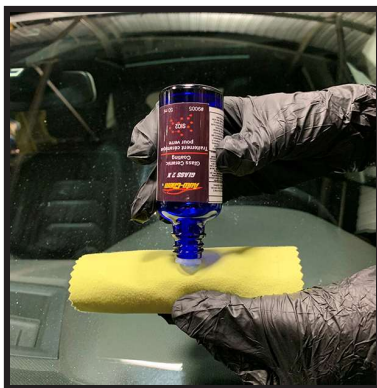

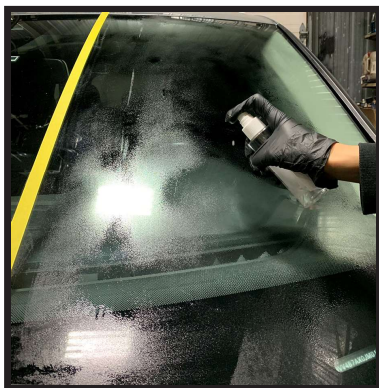

GLASS 2 X is a hydrophobic nano ceramic treatment for glass which considerably reduces the adhesion of water and dirt on the glass surface. This nano glass treatment is essential for your safety. It increases visibility when you take the road in bad weather. One glass treatment set can treat up to 3-4 windshields. The protection time is 1 year / 12 months.

Advantages :

- 90% less maintenance.
- Allows to treat 4-5 windshields.
- 1 year / 12 months protection.
- Allows cleaning of treated surfaces very easily.
- Spectacular hydrophobic property.

Instructions :

- 1) Clean and decontaminate the glass with a 70% alcoholic product. Make sure the glass is dry and tempered before application.
- 2) Wrap the microsuede cloth around the sponge and apply the product generously to the cloth.
- 3) The application must be done from left to right vertically and then horizontally thereafter.
- 4) Allow the window to dry for 2-3 hours in a shelter from bad weather and do not operate the wipers during this period of time.
- 5) After 2-3 hours wipe the glass (microfiber cloth recommended).
