

BLUE CHECK

Micro leak liquid detector

Description :

BLUE CHECK makes it easy to find microscopic gas leaks. Used by HVAC repair technicians, Blue Check fluid forms a tough film, to make long lasting bubbles on the surface to locate microscopic gas or air leaks at a glance. Blue Check is effective down to -30 Celsius

Advantages :

- Essential for finding microleaks.
- Used for heating, ventilation and air conditioning systems.
- Detects all leaks on pressurized systems.
- Effective down to -34 degrees Celsius.

Instructions :

Turn off or disconnect the power source from the system. Spray Blue Check liberally on surfaces that may be the source of the leak. Focus on connector gaskets and valves. You can swipe your finger to remove the bubbles created by the spray. Bubbles will form almost instantly for most leaks. With microscopic leaks, you will need to wait 5 to 30 minutes for bubbles to appear. Wipe or rinse after detection.
