

# **SNOW FOAM**

## Super Foam Car Wash

### Description :

Auto-Chem SNOW FOAM Car Wash is formulated to create micro foam bubbles. It can be used as a traditional soap and diluted in a bucket or used with a foam gun to maximize foam coverage to deliver a thick rich blanket of surface covering foam.

This foaming car wash eliminates dirt, grime and environmental contaminants yet gentle enough on paint as well as on all waxed and sealed surfaces. The pH-neutral formula lifts dirt and grime away from paint where it can be safely rinsed away.

The SNOW FOAM is developed to be safe on all vehicle surfaces including paint, rubber, vinyl, glass and plastics. It can be used on any finishes as well as boats and RVs. This formula is super concentrate, dilute according to your desired needs.

### Advantages :

- Effective for foaming gun, hand or pressure washing
- Highly concentrated product
- Dense foam that enhances shine.
- Does not leave traces and rinses easily.

### Instructions :

Prepare the foam gun by filling the tank with half water, then fill with the soap. Gently rinse down the car with water to remove any loose debris and grime, then fix the foam gun and cover the car with soapy suds. Fine tune the soap mixture knob to the desired foam thickness, and adjust the front fan nozzle to the perfect spread to quickly cover any vehicle. The bubbly soap begins to break down and lift stuck-on dirt and grime from the surface of the vehicle.
